

# GLUTAPAK® R

*Powerful Combination that Protects and Restores Intestinal Health*

*For the Dietary Management of Gastrointestinal Disorders and Dysbiosis in Children*

Nutrition & medical products for a healthier life

# For the Dietary Management of Gastrointestinal Disorders and Dysbiosis in Children

Presentation: Powder			
Catalog No.	Units/Case	Unit Size	Content
70022	50 sachets	15g sachet	10g of L-glutamine and 10 <sup>8</sup> CFUs of <i>L. reuteri</i> Protectis

## Glutamine

- ✓ Glutamine is a source of energy for gastrointestinal tract cells.
- ✓ Glutamine helps repair damage to the intestinal mucosa caused by disease.
- ✓ Glutamine has been clinically proven to reduce intestinal distress and improve bowel function.

## Lactobacillus reuteri

- ✓ Reuteri is a superior probiotic that fights off rotavirus and other pathogens that cause diarrhea and gastrointestinal disorders.
- ✓ Reuteri colonizes the intestinal mucosa and prevents bacterial overgrowth by producing powerful antimicrobial substances.
- ✓ Reuteri has been clinically proven to reduce diarrhea and restore the intestinal flora.

### Recommendations\*

To counteract the causes of malabsorption and protect the gastrointestinal tract:

Infants and Children ≤ 20 kg: 0.5 g/kg/day  
 Children >20 kg: 1-3 sachets/day, depending on weight

### Preparation and Administration

**For oral use:** Mix Glutapak<sup>®</sup> R with 60-120 cc (2-4oz) of water, beverage, formula or food at a temperature range of 10°C – 45°C (50°F – 113°F) and consume immediately. Glutapak<sup>®</sup> R should not be mixed at extremely hot (above 45°C) or extremely cold (below 10°C) temperatures, because this may affect the *Lactobacillus reuteri*.

**For enteral use:** Mix Glutapak<sup>®</sup> R with 60-120 cc (2-4oz) of water and administer through feeding tube immediately. Flush feeding tube before and after administration. Glutapak<sup>®</sup> R should not be mixed with enteral formulas administered through feeding tube, since the addition of Glutapak<sup>®</sup> R may cause formula to thicken considerably and clog tube.

GLUTAPAK<sup>®</sup> R IS NOT A COMPLETE DIET  
 GLUTAPAK<sup>®</sup> R IS NOT FOR PARENTERAL USE  
 DO NOT HEAT, FREEZE OR AUTOCLAVE GLUTAPAK<sup>®</sup> R

\*Glutapak<sup>®</sup> R recommendations are based on glutamine and *Lactobacillus reuteri* dosages that have been clinically demonstrated to reduce symptoms of diarrhea, gastrointestinal disorders and gastrointestinal side-effects of antineoplastic therapy as well as improve gastrointestinal function (see Glutapak<sup>®</sup> R Product Monograph).

Protected by corresponding patents 5,949,289 and 7,374,124 and other issued and pending patents.
