New Yellow Jacket 110 Series Orbital Stretch-Wrapper

The only orbital wrapper designed to wrap the full length of the pallet right on the forklift.

Orbital "lock-down" technology moves a horizontally positioned stretch wrap dispenser around and under the pallet as the system is manually or automatically advanced across the length of the load. For a quick, safe and secure load to the pallet every time, the Yellow Jacket 110 is the clear choice over other stretch wrap methods. Pick your model below. Need help? See our Product Selector Guide.

New 110 Series Benefits

- Simplified machine design resulting in minimal machine maintenance
- New film carriage which allows for fast, easy and ergonomic film loading
- Easy upgrades - Ability to easily upgrade the manual machine to a semi-automatic machine as your business grows and your needs change

Model 87

- 87-M** Manual Unit
- 87-SA** Semi-Automatic Unit

Model 100

- 100-SA** Semi-Automatic Unit - Automatic Cut & Clamp Device Optional

Load Calculator

Your Maximum Load Height (inches)

Your Load Width (inches)

Your Calculated Load Diagonal

Note: After you have calculated your load diagonal, use application chart below to see which machine will accommodate your load size. Calculations are to be used as a guideline only (other variables may affect the calculation). Length of item has no bearing on this calculation. Please consult with Yellow Jacket if you have questions.

Load Calculator Application

Load Diagonal (Maximum)	Recommended Ring Size
110 Series Machines*	

up to 68" maximum

87" Diameter Models

up to 100"

100" Diameter Models

* Larger and Smaller Custom Sizes Available

Note: Click on link that correlates to your load diagonal range (number from load calculator).
