#### Video

- Solder safely with lead-free, cadmium-free Solder Fast® paste solders.
- Paste formula is free-flowing at very low temperatures from the heat of a soldering iron or torch and creates a clean, tarnish-free, silver-color joint.
  - Ideal for use with all non-ferrous metals except aluminum.
  - Extremely strong final joint is silver-colored.
  - Jar contains 10 ozs.
  - Special flux formulation eliminates additional fluxing; no pickling is required.
  - Suitable for professional jewelry work or craft projects.
  - Composition: 96% tin, 3.5% silver, 0.35% antimony and a flux agent.

**please note:** Solder with confidence; all solder sold by Rio Grande has been cadmium-free since the late sixties, when the health risks of this element became known.

Rio Grande. Recommended by jewelers since 1944.
