4337 - JDA Foundation and Platform Technical Training

Event | JDA ILT

This learning track is designed to introduce the JDA Foundation architecture that is common to all Manugistics web applications and cover the technical aspects of the Supply Chain Planning and Optimization (SCPO) solution. This will also provide participants with an opportunity to learn about the installation, configuration and administration of the Foundation and the SCPO applications by combining the material from the separate courses into a one week course.

DETAILS

Event Number: PLTF-4337

Objectives:
You should consider enrolling in the JDA Foundation and SCPO Technical Training track if you:

- Install and configure the JDA Foundation
- Install and configure the SCPO Applications
- Create and administer the database schema for the Foundation and SCPO Applications
- Administer security for the SCPO Applications
- Create, maintain and/or execute batch jobs for the SCPO Applications
- Perform administration and maintenance of the JDA Foundation Server
