VeriTracks
Cloud-Based Monitoring Application

VeriTracks is the universal software for all of the hardware Satellite Tracking of People manufactures. All enrollee information and monitoring data uploads into the cloud-based application is securely stored in the application. As a cloud-based application, supervising agencies avoid downloading software onto its IT network or individual computers. Authorized individuals have access to VeriTracks 24x7x365 using any computer with a high speed Internet connection.
