

LACTOBACILLUS ACIDOPHILUS is a microorganism found in normal, healthy intestinal flora. This is the DDS-1 strain of *L. acidophilus* – a specially cultured, selectively isolated super strain, originally discovered and extensively researched by Dr. Khem Shahani, Ph.D. at the University of Nebraska. It has been grown in a natural medium and stabilized both before and after freeze-drying with natural stabilizers.

STORE IN A COOL, DRY PLACE AND REFRIGERATE AFTER OPENING.
