Customer Info

[Installation Guides](#)

White Lightning® is permanent electric fencing that combines high tensile wire for strength and polymers with a mixture of carbon for safety and conductivity. Our three shock point design provides 360° conductivity.

White Lightning® withstands impact without risking injury to your horse. Our coated design means no slicing or cutting injuries.

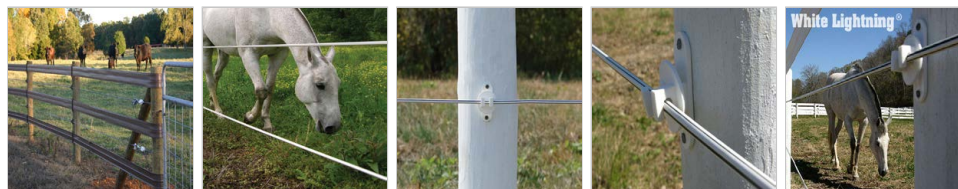

White Lightning® installs like electric high-tensile wire and is engineered for durability, resistant to wear and withstands extreme temperature ranges. It is effective in high-tensile installations regardless of overall fence length.

- Withstands expansion rates due to temperature changes
- Unique co-polymer 12.5 gauge galvanized hightensile steel wire embedded in a tough HTP® Polymer coating with electric properties
- White Lightning® is manufactured in Muscle Shoals, Alabama
- Fence life is 20+ years with a 20-year limited warranty
- White Lightning® coated high tensile wire is easily combined with other Centaur rail and strand fencing to fit your budget or design needs

Specifications

Fence	White Lightning
Roll Length	1320'
Colors Available	White, Black, Brown
Break Strength	1400lbs
Warranty	20 Years
Electric or Non Electric	Electric
Total Width	5/16"
Post Space Recommended	12'
Post Type	Wood, T-post, Fiberglass
Cost	Approximately .13/ft plus accessories
Samples Available	Yes
