Ingrasys has the experience, capability, and R&D resources to make any OEM/ODM integration with flexible tailor-made design and manufacturing service. To fulfill our customer's requirement with high quality, cost-effective products, and quick time to market in product development, we have established and assembled an OEM/ODM team to cater to the specific demands that off-the-shelf products could not meet. Ingrasys is an extremely versatile turnkey manufacturer with the ability to bring your concepts and ideas into viable computing solutions.

Once customer provides us with concept information and detailed specifications, we will notify them of the total cost for design, prototyping, and estimated cost before the project begins. In addition, the winning of **ISO 9001:2008** certification ensures the exactitude of our research and development procedures with the highest product quality. For complete customer satisfaction, we also provide an extended product service and warranty program.

Ingrasys OEM/ODM services cover the full project life cycle. We maintain stringent quality standards in our manufacturing processes, and ensure products go through rigorous quality checks at every stage of production. Our goal is to offer our partners the best quality products at the best price to performance ratio, along with the superior service.

#### ➤ Service Flow Chart
