

➤ Mission & Focus

Ingrasys offers not only the network computing solution, but also upgrades service to all the strategic suppliers, OEM/ODM customers, solution partners and distribution partners. We endeavor to be the leading business providing value added services in the networking and device technology.

We advance the technologies in the fields of test & measurement in order to provide superior quality and cost effective solution for all of our partners. Ingrasys will be the best partner of success creating lasting value in your business journey.

➤ Our Core Value

Innovation is the most important value for Ingrasys. We are constantly developing unique and value-added products. Ingrasys has an innovative R&D team, intelligent management system, and high quality assurance to encourage customers with the fastest time-to-market services all over the world.

➤ Design and Manufacturing Service (DMS)

We support OEM/ODM services to reduce customers' engineering effort and accelerate the product development process to help customers get ahead of the market competition. Ingrasys provides cost-effective, faster Time-to-Market design and manufacturing service which provides tailor-made systems to meet specific application requirements through the different levels of customization capability, flexible manufacturing and post-manufacturing service. We also have accumulated over a decade of experience and domain Know-how in DMS.
