VFA.facility Facilities Capital Planning and Management Software

VFA.facility facilities capital planning and management software enables organizations to manage condition and sustainability information about facility assets and leverage that information to create capital projects, plans and budgets. VFA clients in government, education, healthcare, and corporate markets use VFA.facility to manage more than four billion square feet of real estate assets.

VFA.facility is an award-winning cloud-based solution for facilities capital planning and management that provides a central source of facility data, and gives facility managers, capital planners, financial analysts and executives the tools they need to make optimal decisions about facility spending, sustainability investments and capital planning.

VFA.facility Benefits:

- Build compelling capital budgets for facilities renewal and deferred maintenance
- Validate and justify budgets based on condition data
- Execute capital plans with integration to procurement and work order systems
- Manage and reduce capital asset costs
