Timeless design meets ultimate functionality

Ultimate Visibility in Sleek, Sophisticated Style

The Heritage™ Deluxe Natural Spectrum® Floor Lamp goes to great telescoping heights to deliver sleek, sophisticated style while sharpening vision and relieving glare, eyestrain and fatigue. It's no buzz, no flicker, and no glare engineering combined with our patented Natural Spectrum® 10,000 hour bulb make virtually every visually demanding task easier to perform for longer periods of time.

Relief from Reflective & Peripheral Glare

The Heritage was engineered with Optix® glare control lens and Flicker Elimination Technology® to bring you the most uniform light without glare, flicker or annoying buzzing sound. Even the most avid reader or hobbyist can say goodbye to eyestrain and fatigue with the Heritage.

Ergonomic Advantages & Quality Construction

With uncompromising quality, the Heritage is constructed of the highest-grade components of steel, zinc and aluminum plus a replaceable ballast system for heirloom reliability. The unique heat-dissipating alloy head, which rotates 180° and swivels 360°, remains cool to the touch so you can redirect the light even when the lamp is on. Select from three levels of light intensity with the 75-100-150 watt equivalent brightness control and adjust the height for precise ergonomic comfort.

Easy on the Eyes and the Earth

This lamp's energy efficient technology and 10,000-hour bulb provide greater light output with 1/5 the energy usage of ordinary bulbs, creating less waste for the earth and more savings for you.
