You have control of your order.

Cancel or replace at any time during the execution period, place limits on price or percent of the volume, and control the trading behavior using different tactics. The system follows your instructions while you control the big picture.

Access AES from the system you already use every day.

Send orders directly to AES from your existing EMS or OMS. AES is integrated with more than 70 of the leading trading platforms, or it can be accessed directly via a FIX connection.

Algorithms – Credit Suisse's algorithmic strategies can help reduce market impact, improve performance vs benchmarks and let traders focus on the big picture.

All AES algorithms take advantage of Credit Suisse's internal liquidity pool (Crossfinder), where available, as well as smart order routing capabilities for both displayed and nondisplayed liquidity. Custom strategies are the norm at Credit Suisse with hundreds of client customizations globally.

Global Market Access – AES's robust infrastructure gives you access to more than 75 exchanges and liquidity pools globally, including over 40 equity exchanges.

Multi-Asset – AES industry-leading algorithms are available for Equities, Options, Futures and Foreign Exchange.

Pathfinder – AES's smart order router which intelligently executes across scores of execution venues globally.

Crossfinder – Take advantage of Credit Suisse's robust, deep pool of internal liquidity through its state of the art Crossfinder engine.

Crossfinder Plus – Seeks liquidity from Crossfinder and an ever increasing list of both independent and broker-owned dark pools.

Ultralow Latency/Co-location – AES provides best in class global solutions for low latency DMA, crossing and smart routing. Magic (Market Access Gateway).

Pairs Trading – AES manages your pairs to capture your target ratio, premium discount or spread.

Storyboard – Real-time updates on trading events related to your orders.

Analytics – AES provides a variety of client analytics for full transparency, before, during, and after the trade.

Blockfinder – Trade blocks while using AES.
