Integrate with iNEWS and ENPS workflows

1

Description System Requirements Specifications

## Integrate with iNEWS and ENPS workflows

Integrate Media Composer directly with iNEWS and/or ENPS systems to streamline your news editing to on-air workflow with this option for Media Composer | Software. The Media Composer | NewsCutter Option adds the functionality of the NRCS Tool found in previous NewsCutter software, which is now discontinued, though many of its features and settings are now a part of Media Composer.

- Get the full NRCS tool feature set previously available with NewsCutter
- Open an interactive iNEWS or ENPS session from within Media Composer to view stories, rundowns, and scripts
- Edit video directly to scripts for the fastest turnaround times
- Use iNEWS locaters to drop preselected text to the Media Composer timeline
- View Running Orders and dynamically build and control a playlist within an ENPS media server
