## COMMUTE TOO SLOW? GET IN THE FLOW!

Welcome to FloZones.com!

## Traffic Updates

[View Current Detroit Traffic](#)

Tired of stopping and starting along clogged freeways and streets? Welcome to the future of urban traffic management . . . FloZones, Inc.! FloZone and GoZone managed routes are the next major step forward in making your daily commute a breeze! By synchronizing the traffic lights along major streets and roadways, FloZones, Inc. is able to make your daily commutes across town smooth and enjoyable! No more "getting stuck" at poorly timed traffic lights . . . just jump on the nearest FloZone or GoZone managed route and enjoy the ride!

What's the difference between a FloZone and GoZone managed route? GoZone managed routes have traffic signals that are timed to FloZones, Inc. standards by the local city, county or state transportation department while FloZone managed routes are timed exclusively by FloZones, Inc. for maximum synchronization and driver convenience!

Whether you travel by a FloZone or GoZone managed route, your trip will be faster, with less stopping and your ride more enjoyable . . . you might even have enough extra time to get a little shopping done while on your way!

If your government or agency would like to optimize the use of roadways in your city, county or state, please contact us at [sales@flozones.com](mailto:sales@flozones.com).
