

ThermoGraph

Our ThermoGraph foam is the ultimate fusion of sleeping comfort technologies. ThermoGraph is a fusion of three rapidly heat transferring materials: Gel Memory foam, open-cell - breathable Memory foam and Graphite. We then enhance this fusion with ThermaPhase. This quickly absorbs body heat to immediately transfer the heat through the open-cell structure of the foam. These incredible fusions leave the comfort surface the optimal sleeping temperature quicker than any other foams.

Micro-Encased Coil Technology™

3. ENHANCED SUPPORT

Coil-on-Coil technology for the ultimate in support and conformance. The bottom layer of coils provide unparalleled support, while the top layer of mini-coils conforms faithfully to the body - helping to ensure a restful and refreshing night's sleep.

Dynamic FoamTex

4. PRESSURE RELIEVING CONFORMANCE

Our **Dynamic FoamTex** is an energetic foam that is a highly breathable, cool and responsive. This pressure relieving foam conforms like memory foam but is highly resilient like latex, giving you the best performance of both foam technologies.

Reaction Coil System

5. INDIVIDUALIZED COMFORT

616 Active Coils along with 330 Reactions Coils work together to comfortably support each individual body shape and size to improve posture alignment while reducing motion disturbance.

Chiropractor Tested. Chiropractor Trusted.™
King Coil Mattresses are the only mattresses endorsed by the International Chiropractors Association (ICA).
