Combination of Glutamine and *L. Reuteri*

Glutapak® R provides 10 g of glutamine and 100 million colony-forming units (CFU) of the superior probiotic, *Lactobacillus reuteri*. Glutamine nourishes the intestinal cells and helps repair damage to the intestinal walls due to injury or disease, improving digestion, absorption, and the patient's nutritional status. *L. reuteri* restores the intestinal flora and inhibits the growth of pathogens that cause diarrhea and other intestinal problems. Protected by corresponding patents 5,849,289 and 7,374,924 and other issued and pending patents.

Glutamine + *Lactobacillus reuteri* Combination

Glutamine

- Conditionally essential amino acid that nourishes the cells of the gastrointestinal tract
- Helps repair intestinal damage caused by diseases, infections and metabolic stress
- Clinically proven to reduce gastrointestinal discomfort and improve bowel function

Lactobacillus Reuteri

- A superior probiotic that effectively colonizes the gastrointestinal tract
- Fights off pathogens that cause diarrhea and other gastrointestinal disorders
- Clinically proven to reduce diarrhea and restore intestinal balance
