## About FallTech

FallTech is a leading manufacturer of fall protection products built for all industries where workers are exposed to falls from elevation. Headquartered in Compton, CA and marketed globally, FallTech is staffed with engineers, product developers and experts dedicated solely to the design, testing and manufacturing of fall protection products. In combination with dedicated application experts in the field, for over twenty years, FallTech has been outfitting people when they are exposed to fall hazards at work and tackling fall protection problems the way they happen in real life... one worker at a time.
