

638-3310

### Hands-on Cell Models

(Singly or Set of 2)

These resilient, colorful EVA foam models feature removable parts. Teacher's Manual has labs, reproducible worksheets and cross-curricular labs.

### Animal Meiosis Plaque

(The Science Source®)

This meiosis plaque illustrates reduction division of the animal cell. Key cards included. 46 x 61cm. 2kg

### Mitosis/ Meiosis Cell Models

Cell replication is a difficult concept to grasp. Teach mitosis, meiosis, cellular division, genetic inheritance and more with this colorful set of snap-together plastic pieces. Chromosomes connect to create genes or alleles. Instructions.

### Plant Cell Meiosis Plaque

(The Science Source®)

This large relief model shows every known organelle and two important cells. Heavy plastic vacuum-formed sheets are molded to form 23 structures which are identified by accompanying key cards. 18 x 24". 46x61cm. 1.2kg.  
B142\*.....\$282.50

### Animal Mitosis Model (The Science Source®) (Set of 8)

Our sequential models graphically illustrate the division of chromosomes and mitotic apparatus. Organelles and cell inclusions are embedded in strong, crystal-clear plastic globes containing: nucleus, nucleolus, double thread chromosomes (in different colors), centrioles, centromeres (kinetochores), aster, and spindle fibers. With key cards. **Models 1 - 6:** 5 1/4 x 3-1/4 x 3-1/4" (9 cm dia, 13cm high). **Models 7 & 8:** 6 x 3-1/4 x 5-1/4" (13x15x8cm.) **Complete set:** 11 lbs (5.8 kg)

B103\*.....\$685.00

• 8 sequential models

E-book sales have officially topped printed book sales as of 2011.
