RECYCLABLE CONTAINER

OFFICIALLY LICENSED PRODUCT OF THE UNIVERSITY OF KENTUCKY ®

KENTUCKY LIMESTONE WATER
1 LITER / 33.8 FL. OZ. (1 QT. 1.8 OZ.)

Using Reverse Osmosis/Ozonation
SOURCE: Highbridge Springs water comes naturally from underground limestone springs near Fry High Bridge, located in the heart of Kentucky's famed Blue Grass region. The village gets its name from a landmark railroad bridge which is the highest (387') over a navigable stream in the United States. After reverse osmosis/ozonation, this water retains a trace of minerals, assuring a clean, distinctive taste.
