

The FDA TCSD and ASD Network

Key Capabilities and Customer Value

Last Updated June 2017

Overview

- Fenner Dunlop and its nationwide TCSD and ASD distribution network offer belting solutions for all of your industrial needs.
- By conducting extensive research and development based on local markets, Fenner Dunlop and its TCSD and ASD distributor networks provide a comprehensive product line well suited for conveying aggregates, cement, heavy ores, forest products, scrap metal, grain, oil sands, and precious metals.

The TCSD and ASD Value

- Fenner Dunlop and the TCSD and ASD Networks provide value added packages that include premium conveyor belting, conveyor system services, monitoring, conveyor components
- Work with the TCSD, ASD and FDEC Network to select from one solution or an all-inclusive program that reduces total cost of ownership (on a per ton basis) with maximum uptime and safety .
- For mining and industrial companies that demand safety and reliability to achieve peak performance from their bulk material-handling systems, Fenner Dunlop and our vast range of TCSD and ASD locations can provide safe and cost-effective Engineered Conveyor Solutions that maximize system availability.

The TCSD and ASD Value

- Fenner Dunlop TCSDs and ASDs partners with our customers to resolve their issues, prioritize their needs
- Productivity is directly linked to their conveyor systems' health.
- Unplanned downtime due to a breakdown equates to lost productivity, unscheduled maintenance and labor costs, and potentially unsafe working conditions.
- Moving through the process together ensures that Fenner Dunlop is in a position to closely monitor and maintain the health of our customers' conveyor system.
