## About Us

Since we opened our doors in 1992, we have hosted and designed hundreds of thousands of business websites. Due to the phenomenal growth of the Internet, we expect this number to hit the million mark within the next few years. This is not a surprising number given that the Web has expanded in size by a whopping 6150% over the last 11 years - starting with a modest 16 million World Internet users in 1995 and growing to over 1 billion in 2006.

As the Internet grew, so did the need for safe, secure personal sites. It quickly became apparent that the Net wasn't just for businesses anymore. Now users were spending over 30% of their time going online for fun. Recognizing this huge demand, two years ago we started developing the backbone of a complete online solution created especially for families. We envisioned a fun, secure family-oriented online community, where you and your loved ones could safely learn, share, organize and play without fear of being pursued by online predators or having your content and personal information compromised.

Unfortunately, these dangers are a very real threat. In fact, experts estimate that 1 in every 5 children on the Internet will be approached by an online predator. Because of these alarming issues, we have made your family's protection our #1 priority at Famster.

We know that you are entrusting your families to us, which is why we have agonized over every detail of Famster's construction. We have built a secure, fun-filled, family-oriented environment - one that we feel safe to send our own children to.

With over 14 years in the Web hosting industry, we know our business. We've spent years on the Net looking for the finest, most popular features and tools that today's families will ever need or want. We proudly introduce Famster.com - see how Safe fun can be!

### Here's what you'll get as a member of our Famster community:
