Summary

TIBCO Spotfire S+ 8.2.0 supports Windows 7, but does not support Windows 10.

Environment

Details

Details

Resolution:

As noted on its system requirements page, TIBCO Spotfire S+ 8.2.0 supports Windows 7, but does not support Windows 10:

http://support.spotfire.com/sr_splus82.asp

TIBCO has no plans to extend support for TIBCO Spotfire S+ to additional operating systems. We encourage current S+ users to migrate to TIBCO Enterprise Runtime for R (TERR) 4.0, which does support Windows 10. TERR 4.0 is also compatible with many of the user-contributed R packages that are available for download from the open-source R community's CRAN repository. Some S+ GUI users who do not use the S+ programming language may also find it helpful to try TIBCO Spotfire Desktop.
