Fabergé Imperial Bodyguards

Responsible Sourcing, Production of
Colored Stones

Journey to the Chivor Emerald Mine

pg. 109

pg. 133

pg. 163

pg. 168

pg. 212

EDITORIAL

- 103 Responsible Mining, a Trek to Chivor, and a Dash of Fabergé**
Duncan Pay

FEATURE ARTICLES

- 104 Mining Diamonds in the Canadian Arctic: The Diavik Mine**
James E. Shigley, Russell Shor, Pedro Padua, Christopher M. Breeding, Steven B. Shirey, and Douglas Ashbury

Located near the Arctic Circle, Diavik is one of the world's richest diamond deposits and a leader in sustainable mining.

- 132 Fabergé Cossack Figures Created from Russian Gemstones**
Timothy Adams and Christel Ludewig McCannless

Hardstone figures of two Russian imperial bodyguards, commissioned in 1912 by Nicholas II, demonstrate the House of Fabergé's meticulous detail and craftsmanship.

- 144 The Color of Responsibility: Ethical Issues and Solutions in Colored Gemstones**
Jennifer-Lynn Archuleta

Examines the challenges of ethical sourcing and production of colored stones, and what some industry leaders are doing to address the situation.

NOTES AND NEW TECHNIQUES

- 162 The Challenges of Cutting a Large Gem Opal Rough**
Theodore Grussing

A first-person account of cutting a 3,019 ct piece of white opal to create a 1,040 ct gem with play-of-color across the surface.

FIELD REPORTS

- 168 In Rainier's Footsteps: Journey to the Chivor Emerald Mine**
Robert Weldon, Jose Guillermo Ortiz, and Terri Ottaway

Chronicles the famed emerald source through the adventures of Peter W. Rainier, who directed the mine from 1926 to 1931 and restored its former glory.

REGULAR FEATURES

- 161 Thank You, Donors**

- 188 Lab Notes**

Largest Canadian diamond • Type IIa diamond with bright red fluorescence • Separation of black diamond from NPD synthetic diamond • Drilled emerald • Natural blisters with partially filled areas • Yellowish green natural spinel • Large blue and colorless HPHT-grown synthetic diamonds • Yellow synthetic diamond with nickel-related green fluorescence

- 198 G&G Micro-World**

Aurora iris agate • Inclusions in Burmese amber • Chalcedony with quartz windows • "Pond Life" orbicular chalcedony • Garnet inclusion illusion • Iridescent *Spondylus* pearl • Metal sulfide in pyrope • Inclusions in industrial by-product ruby • Quarterly crystal: Triplite in topaz

- 206 Gem News International**

Kämmererite from India • Spectral characteristics of two pearl oyster species • Macedonian ruby • Fluid inclusions in Russian sapphire • Unusual tremolite and diopside bead • Synthetic moissanite imitating synthetic colored diamonds • Steam-dyed amber • Polymer-coated serpentine • Almandine in graphite schist • Australian opal beads with blue play-of-color • Honduran and Turkish opal • African rhodochrosite and Colombian quartz with trapiche patterns • The art of Angela Conty • Robotic colored stone cutting machines • Erratum
