## Procurement Services

Propak has a dedicated procurement team working closely with project engineers to identify and source critical materials early in the design stages of a project. Working with an established global network of over 2000 OEM vendor relationships, Propak's commodity based buyers and full time expeditors work to ensure best pricing and delivery to meet client project requirements.

### Material Management

Propak offers a full range of procurement services including management, buying, material coordinating, commodity inventory control, desk expediting, shop inspection and logistics planning. Propak employs an RFID tagging system for material tracking and progress monitoring; utilized through fabrication and construction. Propak's integrated EPFC approach ensures effective materials management and coordination from shop fabrication through to field construction. Propak's buying power combined with global sourcing capabilities, enables buying leverage that is second to none. Furthermore, Propak will:

- ▶ maintain vendor alliances, OEM agreements and recommend other procurement measures to minimize costs and improve supply chain efficiencies
- ▶ electronically and physically monitor \$29 million worth of commodity inventory
- ▶ provide a dedicated work force of more than 50 employees with extensive material handling experience, planning, executing, and control of the flow of materials
- ▶ evaluate potential new suppliers through a vendor qualification process and manage existing vendors using a report card system
- ▶ prepare and ship completed packages to jobs site while ensuring all required shipping and customs documents are completed
