Engineering Services

Propak Engineering Services delivers a complete suite of multi-disciplinary engineering services with expertise in a variety of energy processing plants. Our clients benefit from the Propak advantage of a completely in-house project engineering and management team. Engineering services are integrated with shop fabrication and field construction facilitating effective communication, increased efficiency and increased productivity.

- ★ Industry leader in engineering for oil and gas processing
- ★ World-Class Experts in modular design applications
- ★ Multi-disciplinary engineering team including process, project, civil, structural, material, mechanical, electrical, instrumentation and automation
- ★ 300+ in-house engineering and drafting staff

Project Cost Estimate Expertise

- ✔ Firm price lump-sum or cost-reimbursable
- ✔ AACE Class I to Class V Estimates
- ✔ Catalogues of historical data on labour and material actual costs utilized in our estimates

Complete EPFC Capabilities

- ✔ End-to-end project management capability, from conception to completion, focused on executing projects on budget, on time, and with uncompromised safety and quality
