## BIO-PRO® BIOLOGICAL AIR POLLUTION CONTROL SCRUBBING SYSTEMS

CECO Environmental is a global leader in air quality and fluid handling serving the energy, industrial and other niche markets. Providing innovative technology and application expertise, CECO helps companies grow their business with safe, clean, and more efficient solutions that help protect our shared environment. In regions around the world, CECO works to improve air quality, optimize the energy value chain and provide custom engineered solutions for applications including oil and gas, power generation, water and wastewater, battery production, poly silicon fabrication, and chemical and petrochemical processing along with a range of others.

For various manufacturing and processing operations, CECO offers BIO-PRO® biological air pollution control scrubbing systems comprised of pre-humidifier, bioscrubber vessels, inert bio bed media, nutrient feed, liquid recycle pump, duct, control panel, and exhaust fan.

Our BIO-PRO™ bioscrubbers, carbon adsorbers, and chemical scrubbers offer different options for our lines of Aerators and Degasifiers. This equipment is custom-engineered as efficient and cost effective solutions for the removal of volatile organic compounds (VOC), methyl tertiary-butyl ether (MTBE), hydrogen sulfide (H2S) and CO2, found in groundwater supplies, industrial wastewaters, and process effluents. We apply decades of experience to optimize efficiency, performance and maintenance to ensure quality and reliable products, while maintaining strict environmental standards.
