

Praetorian Services

We act as extensions of your team offering deep security expertise.

Praetorian hires security engineers, not consultants. To us, that means we do real work, and create real value for our customers. We have a reputation for our deep cybersecurity expertise, and for being true partners.

Customer Focus

Simply put, we are obsessed with customer satisfaction. We believe that true partnership, loyalty, and ultimately our sustained success comes from doing right by our clients. We ask each and every customer to participate in the industry benchmarking Net Promoter Score, and we are proud to have earned a lifetime score of 88.

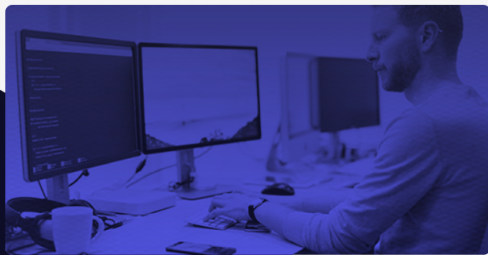

Agility / Efficiency

We know that security is a cost of your doing business. We work hard and efficiently to ensure your money is well spent.

Level of Service

From transactional projects to strategic relationships, Praetorian treats each customer like our only customer. We hire the very best people to ensure your team delivers the very highest level of service. Every time.

Enterprise IT Security

From on-site servers to HR applications in the cloud, your entire technology infrastructure must be secure. Praetorian is your full-service, expert partner. We help business leaders address security challenges across skills shortage, cloud migrations, and rapid shift to detection and response. From tech startups to Fortune 500 customers, we design and implement your security programs as if they were our own.

Product & Application Security

Between project deadlines and user demand for new features, security generally is not the highest priority for product development teams. We help product teams focus on innovation by helping solve your complex security challenges.
