Third-Party Logistics (3PL) and Supply Chain Consulting Division

Asset-Based Logistics Provider

Transportation is continuously changing, and it is essential that your logistics solutions provider arm themselves with best in class people, processes, and technology.

We combine our numerous in-house assets with our robust outsourced provider networks. Besides reduced transportation costs, our approach also alleviates managers and executives of many potential supply chain issues such as freight routing, rate negotiating, visibility and multiple carrier-coordination tasks, allowing them to focus on their planned objectives. Our strategic partnerships allow for reliable, efficient planning and movement of your product via Land, Rail, Ocean, and Air.

Click here to download a DLS Information sheet.

Whether you are looking for total supply chain management solutions or just need to ship your product, we can help you determine the most efficient and cost-effective solution available. Domestic or International, Dependable Logistics Solutions can provide a complete supply chain solution for your business.

Transportation Consulting & Solutions for Executives

In 2011, we developed our Transportation Optimization Program ("TOP") designed specifically for corporate executives, C-level officers, and sole proprietors whose primary goal is to positively impact sales cycles, control costs, as well as improve profit margins within specific or multiple vertical markets. This unique program uses custom company-specific benchmarks to identify inefficiencies within your entire supply chain network. Designed to analyze and optimize your freight spend from a macro perspective, this program's focused approach provides supply chain solutions designed to find new ways to save both time and money while increasing efficiency.

Contact the 3PL Division today to see how we can meet your supply chain logistics needs.

3PL Freight Transportation Services

Our freight consultants pick up where our other divisions leave off, by providing complete supply chain services including warehouse management and both domestic and international freight shipping. They coordinate both standard and custom freight service requirements. If what you need is not on our list, give us a call or e-mail us anyway, we may still be able to help you.

- TOP: Transportation Optimization Program
- Supply chain consulting
- All or partial supply chain management
- LTL / less-than-truckload freight service
- Truckload / TL freight service (service by vans, flatbeds and specialized equipment)
- Rail / Intermodal (IMC)
- Air freight shipping (any quantity, any time, anywhere)
- Ocean freight forwarding
- White Glove Delivery
- Reverse logistics including pick-up, storage and disposal

Contact the 3PL Division today to see how we can meet your supply chain logistics needs.

Why Choose Dependable for 3PL?

- **Asset-based:** Quicker and more reliable access to trucks, services, and warehousing
- **Single point of contact:** Communicate with a single company
- **Volume pricing:** Benefit from our volume and partner relationships
- **No more freight planning:** Focus on growing and maintaining your business
- **Cost-effective:** Shipments that are cost effective and still meet delivery deadlines
- **Easy online access:** Real-time tracking, tracing, and inventory status
