How does it work?

Need Help? If residents need help, they can simply activate a call device by pushing a button or pulling a cord.

Your Call is Heard: Our equipment receives, or “hears,” the call, which determines the resident’s location and sends that data to caregivers.

Your Call is Received: Within seconds, caregivers receive the alert through pagers, computers and phones.

Why a wireless call system?

A call system helps maintain or increase independence and mobility, while still providing the protection you or your loved one needs.

Will the system interfere with other electronic devices?

The system will not interfere with Wi-Fi, TVs, cell phones or pacemakers.

What if a device isn’t working properly?

The system will send an alert to caregivers if there is a device failure or low battery.

Do pendants and other devices track residents’ movement?

No. None of the devices track a resident’s every move. A device’s location is reported to caregivers only when it is activated.

Multiple Call Options

A variety of easy-to-use call devices may be available in your community:

Pendant

Pull Cord

Call Cord

Push Button

Our commitment to resident safety

If you or your loved one needs assistance, you want to have the assurance and confidence that help is on the way with the touch of a button or the pull of a cord. That’s why this community has installed the **CODE ALERT® Quick Response® Wireless Call Solution** from RF Technologies.

- Added safety: residents can call for assistance from anywhere, indoors and outdoors*
- Peace of mind: resident calls will alarm until reset at the device, ensuring every call gets a response
- Pendants are water-resistant for use in the shower†

Dedicated to keeping people safe

An in-house group of experts dedicates their time exclusively to providing the latest in RFID and RTLS security and technology to help protect staff, patients, teachers, students and guests, and enhance staff and facility workflow.

- Engineering: Reliable products enhance safety and reduce liability
- Technical Support: 24/7 phone assistance
- Education: Focus more on care instead of learning a complex system
- Service: Nationwide teams deliver onsite support for peak performance

*Depending on system configuration. †Do not submerge.
