

KNITTER'STM P R I D E

Interchangeable Needle Cord

The cord caps enable you to work on more than one project at a time. The caps secure the cord to the needle and firmly hold your project on the needle, while you remove the needle for use in another project.

60"

150 cm

The key must be used to tightly fasten the needle to the cord. The key prevents your needle tip from coming loose during knitting.

How to use

1. Insert the straight end of the key into the hole in the metal end of the cord.

2. Use the curved end of the key as a handle while twisting on the needle tip.
