

Manage your projects anywhere, at anytime, with connected data in the field and office

Create a secure cloud environment that connects your office and field teams to improve your communication and collaboration. You can utilize any web browser to view your data on a map, redline models, and measure areas and distances. Save time and money with the ability to review and convert data on the fly and better organize projects.

- View connected Topcon devices and transfer real-time data
- See a visual map of projects and geo-referenced datasets
- Convert file types with an easy right click
- Annotate and share redlined models with field users
- Directly connect to Topcon's MAGNET Field and Office products
- Share data with Topcon Sitelink3, Bentley ProjectWise and Autodesk® BIM 360
