

COOLTOUCH II™

CoolTouch II™, the premier system for CoolTouch® Wrinkle Treatments,* is designed to offer effective skin rejuvenation that is safe for all skin types. When used with the TQ10 cooling accessory, the CoolTouch II sequences pulsed 1320nm light with powerful pulsed cooling. Absorbed by water, the pulsed 1320 light heats a uniform layer of upper dermis to therapeutic levels, while the pulsed cooling effectively protects the epidermis. A thermal sensor measures the immediate response and assists the operator in delivering both safe and effective CoolTouch wrinkle treatments.

Benefits of the CoolTouch II System:

- No downtime for patients
- All skin types can be treated

CoolTouch II Specifications

Wavelength	1320nm
Fluence	Up to 24 J/cm ²
Beam Delivery	S-10 CoolTouch Fiber Delivery Device
Dimensions	31" high, 18" wide, 21" deep (79cm x 46cm x 53cm)
Weight	160 lbs (73KG)
Utilities	115 VAC, 50/60 Hz, 20A, Single Phase 230 VAC, 50/60 Hz, 15A, Single Phase
