# Advantage Series Nasal mask

## CPAP Mask

The Advantage series nasal mask from CareFusion gives you feature-rich options with a small footprint. This mask features a triple seal, designed to offer three levels of leak protection, adapting to the facial features of the patient. The flexible bellows react to the patient's movement, reducing pressure points and leaks to give giving the patient a comfortable experience through even pressure treatments. The Advantage series was also designed with the bed partner in mind. The low-profile vented elbow design quietly diffuses exhaled air down and away, keeping the experience positive for patients and their loved ones. This lightweight and featured mask is the true value option for our customers, provider or patient.

### The CareFusion Difference

- The triple silicone seal and flexible bellows are features of the Advantage series
- Bundling with our oxygen portfolio can help minimize vendors and drive cost savings
