AtheNAMulti-Lyte®TestSystem

ANEWGOLDSTANDARDINDIAGNOSTICTESTING

The AtheNA Multi-Lyte® Test System has become the gold standard in diagnostic testing. Based on powerful xMAP® technology, AtheNA Multi-Lyte® allows for simultaneous measurement of multiple analytes in a single assay. Compared to typical IFA and ELISA tests, AtheNA Multi-Lyte® reduces the number of steps required for analysis. This simplification results in maximum throughput with a minimized workflow.

Features

- Multiple reportable results generated at the same time.
 - Intra-Well Calibration Technology™
 - SAve™ Diluent
 - Flexible reporting
 - Customized software
 - Common procedure
