About Altus

Altus is a new and quickly growing provider of camera modules for mobile applications.

◆ Our People

Altus Technology Inc. was formed in August 2003 by an experienced team of image sensor professionals.

Our expertise in design and manufacturing is the result of more than 10 years in this industry, and we believe that we have assembled an elite team to provide an outstanding service to our customers.

Our core competencies include:

- Process design for particle control for 3um pixel design.
- Total system design for mobile phone applications including sensor, DSP, optics and mechanical interconnect.
- Fast development cycle time enabling module development cycle time of under 2 months.
- Manufacturing lines capable of ultra high volumes with minimal technical & production risk.
- Technical research and development of image sensors for others and industrial design for image sensors.

◆ Our Commitment

We provide industry leading solutions for camera modules, meeting the highest standards of low light and noise performance.

◆ Our Investor

Altus Technology Inc. was founded in August 2003 and was primarily funded by the FOXCONN group - the largest enterprise in Taiwan.....[more](#)

◆ Our Methodology

Altus use the business model innovated by FOXCONN group, by delivery the philosophy of [CMMS \(what you get is what you need\)](#).

◆ Our Manufacturing

Fully automated and modular design allows fast capacity expansion to meet customer demand.

◆ Our Vision

Enabling Your Success through the best quality, solid technology, innovation and true turnkey services

◆ Our Mission

To win the trust of our customers through the quality of our design, efficiency production service, technology and support.

◆ Minimum and Maximum

We work as a Team to offer maximum results with minimum risk to our customers, shareholders, employees and suppliers, enabling your success.

Join the Team, Partner with Altus!
