

nVISION 08

Over 55 Hours of Jaw-Dropping
Visual Wonderment

THE GREAT BIG VISUAL COMPUTING SHOW

What do NASCAR Racers, physicists, astronauts, MythBusters, and guys with names a like “D34th R41n3r” and “FROSTBEULE” all have in common? They were all at the first annual NVISION 08 conference, along with 9,000 other people.

We hope you were able to join us in the inaugural year of NVISION, the first-of-its-kind visual computing mega-event. It brought together thousands of top visual computing professionals and companies, world-class gamers, innovative artists and designers, and cutting-edge researchers to share their ideas, experiences, and passions. And it helped introduce many consumers to the exciting world of visual computing.

Highlights Included:

- > Defining the Visual Computing space and showing compelling examples.
- > Workshops to learn to make better pictures and videos and optimize PC hardware.

HIGHLIGHTS

Adam and Jaime paint the Mona Lisa
