STRUCTURED SETTLEMENTS

Structured settlements provide a way for you to receive a cash payment now plus additional payments over time for your injury or loss.

The amount of money paid to you in cash up front, the size of each future payment, and the time period for your payments can all be set up to meet your specific short or long term needs.

A structured settlement is a common alternative to an all-cash settlement, and in some cases is the best way for you to protect both your settlement and your government benefits eligibility (if applicable).

Structured settlements offer unparalleled security, flexibility and tax free income that continue up to a lifetime.

To learn more please download the MTSS brochure entitled "[Understanding Structured Settlements](#)" or contact us at 1-866-790-MTSS (6877) to be put in touch with one of our licensed structured settlement consultants.
