As your partner, we work with you to satisfy *your* partners- from the bank to the regulatory agencies to your neighbors - by delivering practical solutions in an economical manner. That means knowing what questions to ask, who to ask, and how to evaluate your unique challenges.

Our environmental team combines the latest best practices and sound technologies, that, along with our global experience, satisfies the unique requirements of each project, regardless of size. Not only do our environmental engineers, scientists and specialists understand local issues, we're able to pool resources from around the world to assemble a team tailored to your specific needs. This may include solving a unique technical challenge or assembling an integrated multi-disciplinary team that offers a total solution with a single point of contact.

- Air Quality & Emissions
- Emergency Response
- Environmental Audits
- Environmental Impact Assessments
- Environmental Management
- Environmental Site Assessments
- Groundwater Modelling
- Groundwater Supply
- Hazardous Materials
- Hydrogeological Studies
- Occupational Hygiene
- Risk Assessments
- Site Remediation
- Waste Management
