

Explorer™ Components

The Explorer™ system is comprised of the following elements:

1. **System Cart** – small, ergonomic design minimizes OR footprint
2. **Pathway™** - intuitive interface provides tool selection, registration, and visualization functionality
3. **Camera Cart** – separate cart enables greater positioning flexibility, houses the “satellite” of the GPS tracking system
4. **Tracked Instruments**
 - a. Abdominal Reference – defines intraoperative space
 - b. Tracked Probe – used to acquire data for registration and verify system accuracy
 - c. Tracked Adapter Multi-Tool – used to track therapeutic delivery instruments
5. ***Laser Range Scanner** – rapidly acquires dense surface data
