Message Sync with Music

The APP can analyze the music in iPhone and generate rhythm data, and then transmit the data to the massager via Bluetooth to control the massager beating sync with the music.

Message Game

Users can customize their own massage rhythm by tapping the iPhone screen or shake the iPhone, which will make the massage more interesting.

Share and Download

Users can share their favorite massage rhythm and download others' massage rhythm via the app.

Personal Setting

Users can adjust some parameters to change the synchronicity and rhythm sensitivity as they like.
