

ReFlex™ Reverse Osmosis Engineering Services

ReFlex™ Reverse Osmosis

High efficiency water treatment and brine concentration for industrial applications, agricultural supply and wastewater reuse and concentration applications. ReFlex™ RO means: Guaranteed Maximum Recovery of up to 98% plus unmatched energy savings, reliability and flexibility.

Standard off-the-shelf membranes from industry-leading suppliers, approved for use in ReFlex products.

Permeate/Clean in Place (CIP) tank

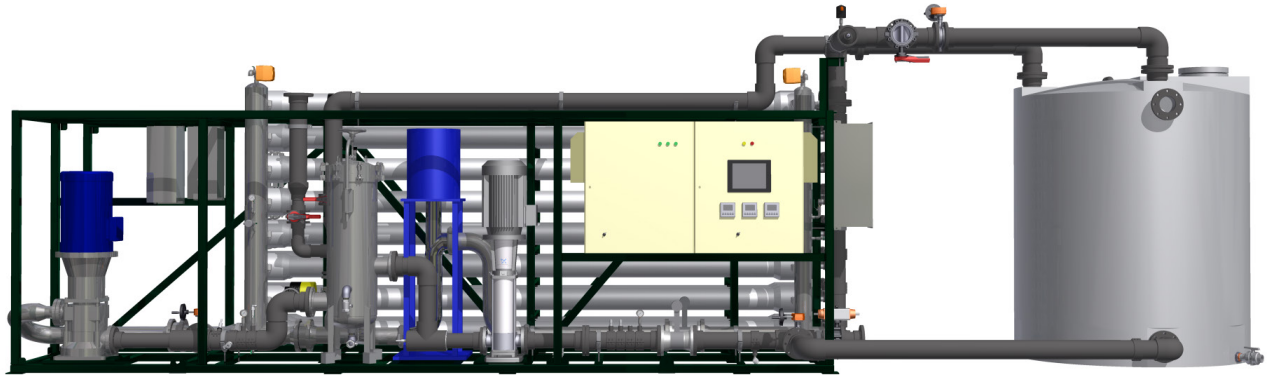

Manufactured and assembled in the USA.

Control Panel – Automatically controls and monitors system performance, and provides full internet connectivity.

Engineering Services

After a water test and analysis the Desalitech team will design and engineer a ReFlex RO water treatment unit tailored to your facilities requirements. From 50 to 900 gallons per minute and a variety of applications, Desalitech is able to provide high quality water treatment engineering solutions.
