How do I listen to music on Facebook?

You can listen to songs by clicking ▶ next to links to songs you see in News Feed or on your friends' Timelines.

Depending on your friends' privacy settings, you might also see a story in ticker that says your friend is listening to a song. Hover over the 🎵 in that story, and click the **Play** button to start listening to that song.

Since external music service providers host music, you'll need to install a music app before you can listen to music using links on Facebook.

If you haven't installed a music app yet, you'll see an app install screen when you click ▶ or 🎵 . After you install the app, the music service provider might ask you to complete steps (ex: downloading a program to your computer) in order to subscribe to their service.
