Producing Critical Thinkers

Critical Thinking

- “Purposeful thinking in which the thinker systematically and habitually imposes criteria and intellectual standards upon the thinking” - Paul, R. & Elder, L.E. (2001).

CAMP-CARE 101

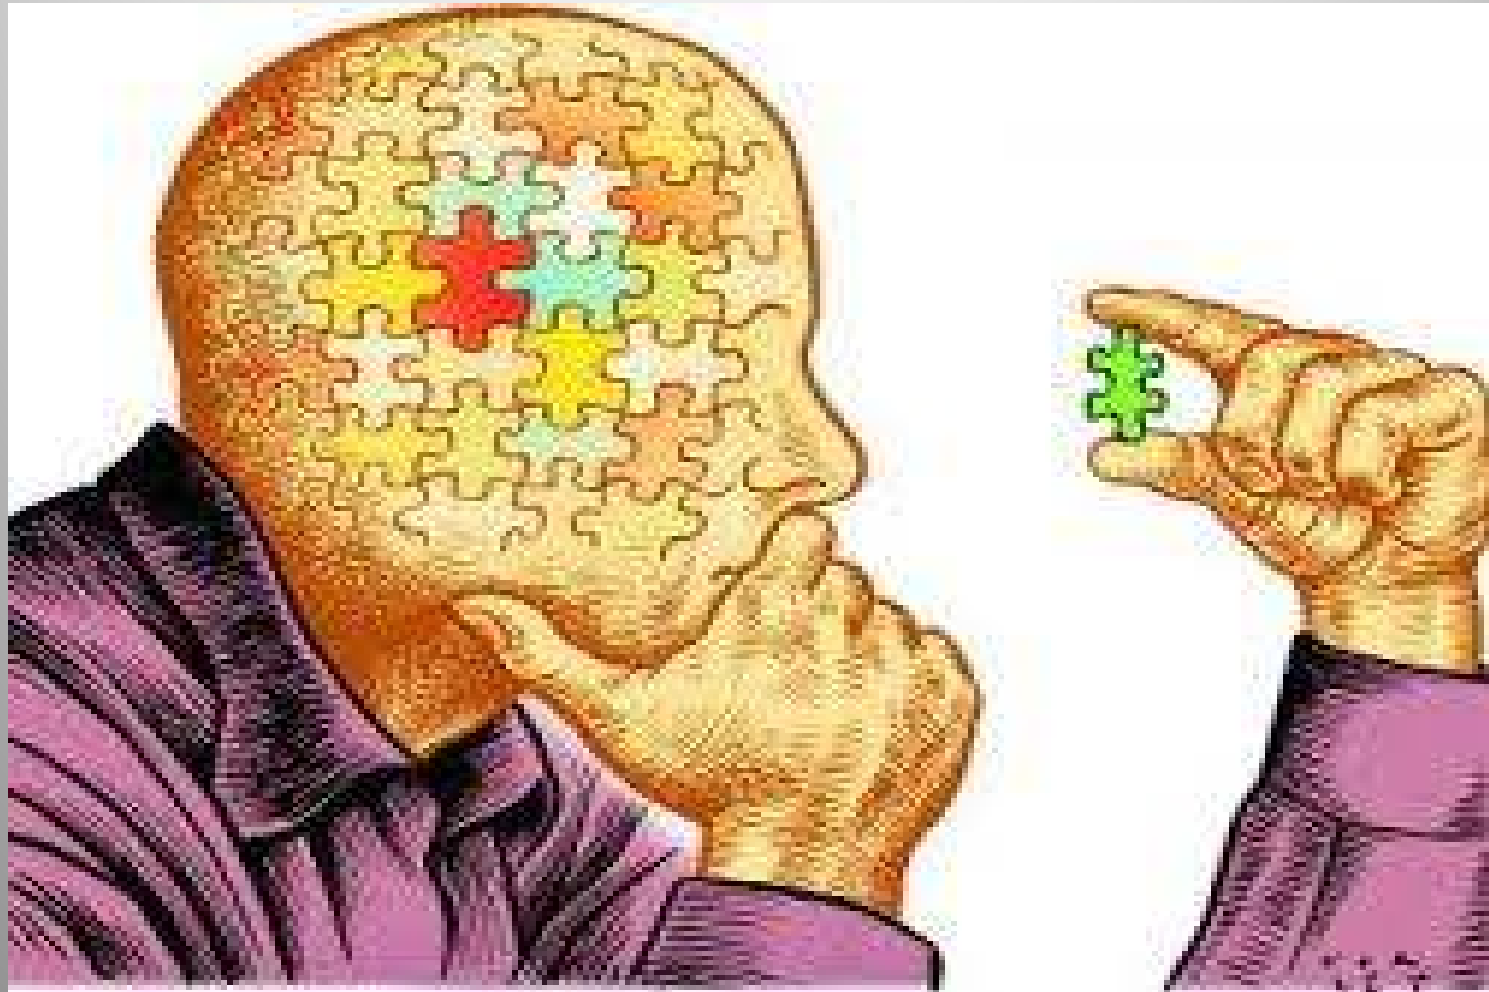

- Training Module Designed to Develop Higher Order Critical Thinking Skills or “Investigative Analytics”
- Incorporates Lecture, Learning and Interactive Modalities, and Assessments
- Course Required for Each Knowledge Worker Pathway in CAMP

CAMP-CARE 101

Core Curriculum Module

- Incorporated into all CAMP Knowledge Worker Pathways
- Tailored Instruction Specific to Job Description Requirements
- Utilizes Intelligent Reasoning Application

Intelligent Reasoning Application

Elements of Intelligent Reasoning Application

Critical Thinkers Routinely Apply Intellectual Standards To The Elements Of Reasoning In Order To Develop Intellectual Traits

WHY CARE 101?

- “Critical thinking is not only essential but an expectation of healthcare professionals. “Critical thinking is increasingly being recognized as the cognitive engine driving the processes of knowledge development and professional judgment in a wide variety of professional practice fields.”
- Facione, N. C., and P. A. Facione. (1996).
