Generators 101

The hows and whys of backup generators

The systems we offer are permanently installed devices that resemble an outdoor air conditioning unit. And they're ready whenever and why ever you need it.

As the traditional power distribution isn't always the most stable, power outages can disrupt your life and even be disastrous if you have critical electric appliances and equipment in your home. No matter where you live, storms or other events that cause outages can be avoided. You can eliminate lengthy hotel stays, sweltering summer days without AC, spoiled food or temporary relocations by installing a generator on your property.

20%

Percentage of outages caused by fallen trees

Because a nice breeze isn't always all that nice.

11%

Percentage of outages caused by animals

Because birds, squirrels and other animals have minds of their own.

29%

Percentage of outages caused by equipment

Because over time, things can deteriorate.

27%

Percentage of outages caused by weather

Because Mother Nature can have a mind of her own.

7%

Percentage of outages caused by human error

Because we're all human and accidents happen.

7%

Percentage of outages caused by...something else

Because things happen when we least expect them.

Products

NRG makes it easy and affordable to protect your home's power needs with backup generators from Generac, Briggs & Stratton, GE and Kohler.

Maintenance Plans

We offer a maintenance plan that includes one multipoint generator inspection and servicing appointment each year, or every 100 hours of run time. You'll also enjoy priority scheduling if unexpected services are needed during the year.

The midpoint inspections will:

- ✓ Check enclosure louvers
- ✓ Check battery electrolyte levels and charger
- ✓ Inspect the generator control panel
- ✓ Check the generator transfer switch
- ✓ Check valve gap (adjusting it if required)
- ✓ Inspect the engine compartment
- ✓ Check electrical components (evaluating voltage and frequency)
- ✓ Perform a diagnostic check of automatic standby system/voltage regulator
- ✓ Assess the integrity of your entire fuel system, fuel regulator and fuel line
