

PLAYMAKAR™

Goodbye Wires. Hello Relief!™

Experience the freedom of wireless therapy coupled with powerful output and low-profile design.

PlayMaker™ by iReliev® packs a powerful punch of clinically proven electrotherapy in one all-natural therapeutic wearable system. Its combination of Transcutaneous Electrical Nerve Stimulation (TENS) and Electrical Muscle Stimulation (EMS) offers the benefits of both pain relief and muscle conditioning.

EMS stimulates the nerves surrounding the muscles through medical grade electrode pads by softly contracting and relaxing them while TENS delivers impulses that trigger a natural response that blocks pain signals, leading to fast targeted pain relief.

This innovative prescription-strength technology is designed to be wearable, comfortable, and highly portable. Get back to the sport you love or in the game of life with Therapeutic Wearables™ by iReliev®.
