About the product

- With 1, 2, or 3 presses, Instinct sends texts to let contacts know your live location and if you're safe, uneasy, or in an emergency.
- Customize your alerts: choose what they say and which contacts get each level of alert.
- No monthly or ongoing fees or charges whatsoever.
- Find lost items: the free Revolar app displays the last known location where your device connected to your phone, so you can track down missing keys and other items you attach Instinct to.

Product Description

Everyone has the right to feel safe. That's why we created Instinct – an app-enabled personal safety device that does more than just act as a panic button. With 1, 2, or 3 clicks, it texts contacts your live GPS location, a customizable message, and if you're safe, uneasy, or in an emergency. Plus, Instinct has step tracking, the ability to locate lost keys, and other hidden talents. We designed it so you'll love carrying it with you every day, so it will be there if you ever need it.

Because safety is a universal need, we made Instinct for women and for men; for kids, teenagers, adults, and the elderly; for medical alerts; for runners; for travelers; for at-risk professionals; for hiking and camping; for students and teachers. For any time when you need help fast, can't reach your phone, can't make a call, can't talk, don't know your address, or need to be discreet – just trust your Instinct.

The battery lasts up to a year and is easily replaceable. Simply use the included wearable/keychain accessory to open the device's battery door when it's time to change the battery.

To use Revolar Instinct, you must have a compatible smartphone. Instinct works with iPhone 5 or newer models operating on iOS 9.0 or above, and with most Android™ smartphones operating on Android 5.0 or above and manufactured by Samsung, LG, Google, and Huawei.

Revolar has a 45-day return policy and offers a 1-year limited warranty. To reach Revolar customer service, email hello@revolar.com.

As Seen On...

Help the Moment You Need It

With multiple alerts levels, Revolar Instinct lets you send for support as soon as your gut tells you something is wrong. Just double-click to send Yellow Alerts to contacts with your live location and a custom message. Yellow Alerts can even make your phone ring with a pre-recorded voice on the other end of the line to excuse yourself from uncomfortable or awkward situations. That way, you can get the support you need before a situation becomes worse.

Safety You'll Love Wearing

Instinct helps you find lost keys and other items, move more with step tracking, stay in touch with positive check-in messages, and get support in non-emergencies with Yellow Alerts. We designed Instinct so you love carrying it every day, so it will be there if you ever need it.

Medical Alerts / Senior Alarm System

Instinct makes it fast and easy to reach out to loved ones with your live location and personal, pre-set instructions. Unlike other medical alert devices that can cost hundreds of dollars per year, Instinct has no ongoing fees or charges whatsoever.

Safety for Students & Kids

Instinct gives students and kids a simple, fast way to ask for help from friends and family. Plus, hook Instinct onto a bag or backpack, and if misplaced, the Revolar app has a map that shows you where you last had it.

GPS Tracker, Item Finder, Step Counter

Instinct is much more than an emergency device – along with sending for help, it can be used to check in daily with family, count steps, track a user's GPS location with a Yellow Alert, make your phone ring to find it, and even find lost items like keys and bags.

Trust Your Instinct

Other personal safety devices tend to treat complex situations as 0-to-100 emergencies. We built Instinct after listening to 100s of survivors who wanted something to prevent bad situations from turning worse.

About the Startup

Jackie Ros
Co-Founder & CCO

Andrea Perdomo
Co-Founder & CMO

Brian Thomas
President & CEO

Laura Sanchez
COO

Tom Davison
CTO

Describe your product in 3 words.

"Don't Panic" Button

How did you come up with the idea for this product?

After her sister was assaulted, Revolar Co-Founder Jackie Ros thought of a "magic button" that could call for help. The idea resonated with her Co-Founder, Andrea Perdomo, who fled violence in Colombia as a child. While the idea was initially to make a non-violent device for women's safety and self defense, it's amazing to see so many people use Revolar in so many different ways.

What makes your product special?

The best safety device is the one you wear every day. That's why we continually add new features like safe check-ins, basic fitness tracking, "Find My Revolar" (and lost items), and "Ring Me" (to find your phone or to ditch an awkward situation). Unlike other emergency devices, Instinct is also extremely small (1"), has no fees, doesn't need recharging, and is attractive to wear on clothes or keys. Plus, in contrast to personal safety options like pepper spray or mace, Instinct is legal to carry everywhere (and can be taken on a plane).

What has been the best part of your startup experience?

Hearing from customers. Since we launched our original wearable in 2016, our users have sent out over 30,000 alerts! It makes our day every time someone tells us how we helped them get out of a bind.

▼
- Question:** Why would this be beneficial to a runner? Please help me see the value of a separate device for safety, if I have to carry my phone with me, too?
- Answer:** Great question! There are a few important ways Instinct would be beneficial to a runner. Effectively, Revolar is a fast, discreet way to send for help to your location in a wide range of both emergency and non-emergency scenarios. We consider Revolar an added layer of protection for those unpredictable times. Sometimes... [see more](#)

▼
- Question:** Can the emergency click be made to be the 1 click if the wearer didn't have time to press more than once in a dangerous situation? Can it do this?

votes
▼ **Answer:** You make the message and set it up with your contacts, so technically you can make any click(1,2,3) the important one. So yes, one click will do it cause you make the message. Hope this helps

▼ **Question:** I've ordered mine and will wear for medical purposes. I see the keychain, etc link. Any suggestions on a necklace, etc. that will fit it?

▼ **Answer:** It does clip on too. As far as a necklace, any would fit, unless it a Mr T necklace. Any necklace would fit fine.

★★★★★ **Finally! A safety device that respects your intelligence.**

By [Jihupoa](#) on May 31, 2017

Have you ever bought a product or service that, designed with the best of intentions to be simple to use that your options are sometimes overly limited or restricted? Fortunately, the Revolar Instinct is simple to use, yet it also allows for a great deal of personalization to your individual preferences. More on this later.

For the past week I've been putting this through its paces with my own "tests," as unscientific as they are, but suffice it to say I'm already sold and am buying these for members of my own family. It's obvious that a tremendous amount of thought and testing has gone into the hardware and software, and below are a few highlights. I'm sure I'm missing a few, but in short, think of the word "solid" in terms of software, hardware, user features, simplicity, and durability.

Hardware:

1. The whole unit is very solid. No flimsy plastic here. It also comes with a solid key ring that you can easily attach to your key chain, lanyard, carabiner, etc. (Did I mention that it was solid?) Even though it's compact, when you hold this in your hand you can really tell it's there.

★★★★★ **Adorable**

By [Daniela](#) on June 29, 2017

Verified Purchase

First of all, it's adorable, but that's definitely not why I bought it. I'm a single woman living by myself in a new city, and I just got a young puppy. I started spending more and more time outside at odd hours and started to feel a little uncertain about my safety since I live off of a busy street.

I started thinking about Revolar since I had looked into them a while back. As a more petite woman, I kept talking myself out of buying their old device because I always felt it was just a tad too large for me to wear. Well, they really did a great job with this new one, it's so tiny and I can't stop looking at it. All my test alerts worked great and I'm all set up with my contacts – this is definitely coming with me on all my morning runs.

★★★★★ **... the past 10 weeks or so and have really loved it! I love having it on my keychain**

I've been using Revolar for the past 10 weeks or so and have really loved it! I love having it on my keychain, I love the feel, the look, and feeling like I can always get in. [Read more](#) ▶

This product has exceeded all of my expectations.

The product itself is beautiful and lightweight, allowing me to wear it with every outfit. I have the option to keep it hidden in my bra or wear it clipped on to the outside of my pants. The app interface and setup is also really simple and easy for anyone to use.

It helps me feel safe when I travel for work, I am able to communicate with my significant other that I have arrived somewhere safely, and it has helped me get out of awkward situations using the 'call yourself' feature.

I love how you are able to personalize your messages for each alert and assign them to specific people.

I can't recommend this product enough, and think it is essential for everyone to have!

By [CSlade](#) on May 31, 2017

It is so comforting to know when my daughter is out and about that she will be able to communicate with others when she feels uncomfortable or scared. I like knowing that I and others will be able to pin point her location and get the help she needs if the occasion arises. I actually just got one for myself as there have been several car jackings lately, and I feel safer knowing I can get help with just a click away. What a great device to have.

[Comment](#) | 13 people found this helpful. Was this review helpful to you? [Report abuse](#)

★★★★★ **Finally!!!**

By [this_is_kmb](#) on May 15, 2017

I am so incredibly impressed with this product! I have tried other options like the Cuff bracelet (the company went out of business and the devices no longer work), and even considered getting a medical alert button to use for this purpose instead.

I do have an Apple Watch, so I debated getting this because the watch does have an "SOS" feature. However, I continue to be skeptical about my ability to reach for my watch with my other hand to trigger the alert. Also, it doesn't have the option to contact your spouse, friend, family first.

I received my Revolar Instinct in the mail yesterday (not sponsored; I bought it myself) and was shocked at how gorgeous it is! The keychain/chip is so awesome - you can wear the device anywhere, really -- you just clip it on. The keychain portion just unclips/slides out if you want to use the clip only.

The fact that the clip/case ALSO works as a way to open the product to replace the battery (and set up the device for the first time) is so rad.

I tested the one, two and three clicks last night with my fiance and we set up messages for each - super easy; and they all worked!

★★★★☆ **A must for anyone who travels, works or happens to be solo.**

By [Mikko](#) on July 1, 2017

[Verified Purchase](#)

This is essential for anyone who plans to be by themselves for extended periods of time. As a wildlife biologist, this give my family and friends piece of mind to know I am well when I am in the outdoors. I also appreciate how discreet the device is to others. My only complaint is that sometimes the app sometimes has a hard time finding my Revolar even if the device is right next to my phone (which is a galaxy 6). I had to restart the app in order to fix the problem.
