

DESCRIPTION

Transit Soil is a soil-applied liquid nutrient product that is designed to resolve nutrient deficiency in all crops.

DIRECTIONS FOR USE

Transit Soil is compatible with most NPK fertilizers regardless of pH. Also, it is compatible with most fertilizers that contain major and micronutrients. However, a standard jar test is always recommended before tank mixing.

RATES & TIMING FOR ALL CROPS	
In Furrow or Pop-up Fertilizers	Mix 6-8 ounces with fertilizers applied near the seed.
Banded Fertilizers	For with the seed, side dressed, dribbled, strip tilled: Mix 8-12 ounces with liquid fertilizers; higher rates of fertilizer require the higher label rates of Transit Soil .
Dry Granular Fertilizers	Impregnate 1.0-7.5 quarts onto each ton of dry fertilizer depending on the final application of fertilizer in the field. Final applied fertilizer should carry 8-12 oz/acre of Transit Soil .
Broadcast Liquid Fertilizers	Mix 8-12 ounces with chemical applications or suspensions.
Irrigation	8-12 ounces can be applied by itself or mixed with fertilizer through irrigation systems.
