

TANDEM™

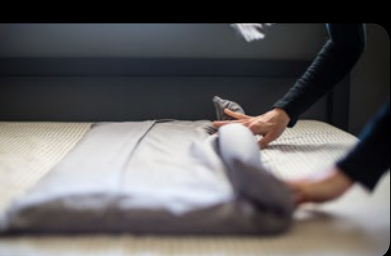

TANDEM's patented 3-in-1 design allows you to take the best parts of your personal pillow with you when you travel. Maintaining consistency in your sleep surface can help reduce the disrupting effects associated with a phenomenon called First Night Effect (FNE), which many travelers experience when sleeping in a new environment.

TANDEM employs a patented dual-pocket pillowcase that houses a pressure relieving memory foam pillow topper. This unique pillowcase is powered by **SHEEX®**, an innovative material that provides moisture and temperature wicking properties along with a luxurious, unforgettable feel.

Turn any conventional pillow into a hybrid pillow that provides soothing comfort all night long. For home usage, simply insert your favorite pillow into the main pocket.

When travel calls, remove your personal pillow, and roll up the patented TANDEM pillowcase with the memory foam pillow topper inside.

Once rolled, insert the TANDEM pillowcase and memory foam pillow topper into TANDEM's machine washable travel cover.

Our innovative travel pillow offers a choice of two soft and breathable sleep surfaces, a ventilated neck lining, and the pressure relieving benefits of memory foam to comfort you throughout your journey.

Once at your destination, remove TANDEM's pillowcase and memory foam pillow topper, and insert the hotel pillow inside the main pocket. This main compartment is Purotex[®] lined to protect you from harmful bacteria and allergens, and provide a clean and healthy sleep environment for the duration of your stay.
