

The use of **XR** (both standard character and stylized mark), and **Extra Reality** trademarks are being invoiced to you. When payment is received you are granted access to use these trademarks for one year in the following three methods:

1. For purposes of marketing the goods and services of others by means of real world digital dimensions triggered with automatic identification sensors, media application software, and/or social collaboration, by means of experiential and sensory digital multimedia, generating seamless, sensory stimuli effects in the nature of temperature, images, smell, rhythm, position and location, motion, balance and/or vibration by Internet Connected Devices ("IoT") such as our smart lock system, smart TV and smart Light Bulbs.
2. For purposes of multimedia entertainment services, namely providing experiential and sensory multimedia generating seamless, real world, sensory stimuli effects in the nature of temperature (Google Next or equivalent), images (through our smart TV's), smell, rhythm, position and location, motion, balance and/or vibration, by Internet Connected Devices ("IoT"), in which that users can digitally interact with and manipulate a dynamic physical environment by means of automatic identification sensors, media applications, and/or social collaboration, for recreational, leisure or entertainment purposes.
3. For purposes of computer services, namely, providing temporary use of on-line non-downloadable software applications that create seamless, sensory stimuli effects in the nature of temperature, images, smell, rhythm, position and location, motion, balance and/or vibration by Internet Connected Devices ("IoT"), for purposes of creating dynamic real world digital dimensions of experiential and sensory multimedia; Computer services, namely, creating an on-line community for registered users to create seamless, sensory stimuli effects in the nature of temperature, images, smell, rhythm, position and location, motion, balance and/or vibration by Internet Connected Devices ("IoT"), for purposes of creating dynamic real world digital dimensions of experiential and sensory multimedia.
