- The Fury 50 inch Electric Fireplace is a 50" x 21.5" x 5.5" size design that can be recessed in a wall or mounted on a wall. Its perfect for the basement, living room, family room or office, where some heat and elegance is needed. It has a 1500W heater which will add supplemental heat to a room up to 400 square ft., and works with a 120V connection. It also features a 1 year factory warranty.
- COLORS and HEARTH OPTIONS: The Fury comes with crystals and a logset, so you can choose if you like the more modern look of the logs or the contemporary appeal of a crystal hearth. The fireplace has 3 flame combinations, with orange, blue and orange/blue. The realistic flame design is a value at this pricepoint. The built-in timer lets you run the fireplaces for 1 to 8 hours with an auto shut off after the timer expires. The flame has 5 intensity settings, from a low-key ember to bolder full fla
- TWO HEAT SETTINGS: The Fury has a heater with a 750W and 1500W setting, so it works with different size rooms, and different temperatures during the year. While the Fury isn't designed to be the only heat in your house, it will raise the temperature of a room on cool evening, or make a room cozy on a winter night. The direct heat brings the temperature of the room up quickly.
- WALL MOUNT OR RECESS: Wall mounted or in-wall recessed mounting is available with the Fury. The heater's blower is just above the flame display. We recommend mounting a flat screen TV at least 12 inches above the Fury fireplace. The flame display is actually cool to the touch, so no worries about small hands reaching up to touch the fireplace.
- SAFE FIREPLACE: This fireplace has a LED flame, so its cool to the touch. There is no gas, propane, gel cans or ethanol needed. No venting or chimneys are required. The Fury is designed for in-wall installation, so there it can safely be placed in your wall thanks to the ventless design.
